

Rolling shutters

The comfort of feeling secure.

Inspired by
the **Sun.**

We love the sun - it inspires us daily. As pioneers in our field, we design excellent solutions that will make life more comfortable and last for years.

Our vocation: advancing new ideas for tomorrow's world.

For greater security and privacy.
Protection made to measure, perfectly
integrated into your facade. Robust,
reliable, sleek.

Why choose **Griesser** rolling shutters?

Choose the comfort of feeling safe in your own home. Without compromising on style.

Griesser is a true expert when it comes to rolling shutters that are tailored to meet these precise needs. We have manufactured these rolling shutters for roughly 140 years: they were the first product we launched on the market in 1882. Ever since our founder Anton Griesser was granted the patent for them, we have constantly optimised our rolling shutters, helping them to achieve premium quality.

Rolling shutters protect in many ways at once – from sunlight, noise, stormy weather and prying eyes. Reliable and in guaranteed made-to-measure quality, fully automated if desired.

Furthermore, our rolling shutters are particularly durable, provide outstanding shade and can help you to make significant energy savings. At Griesser we are sure to have just the right rolling shutters to suit your needs.

Security.

Griesser rolling shutters are equipped with locking system solutions. In several product variants, the slats are filled with foam. The optional lock prevents the shutter from being lifted up and pried open, discouraging potential burglars.

Privacy.

Your privacy stays private: with our rolling shutters, you protect yourself and your home from unwelcome eyes. And thanks to the darkening and noise insulation, you can enjoy undisturbed and relaxing sleep.

Sustainability.

Our rolling shutters relieve heat in summer as well as wintry cold. This means you can avoid using your air-conditioning and heating more than is necessary. You can improve your carbon footprint and protect the environment. And as our rolling shutters are so robust and long-lasting, they are also sustainable. We are proud to be able to say that many of our products are still fully functional up to 40 years after being installed.

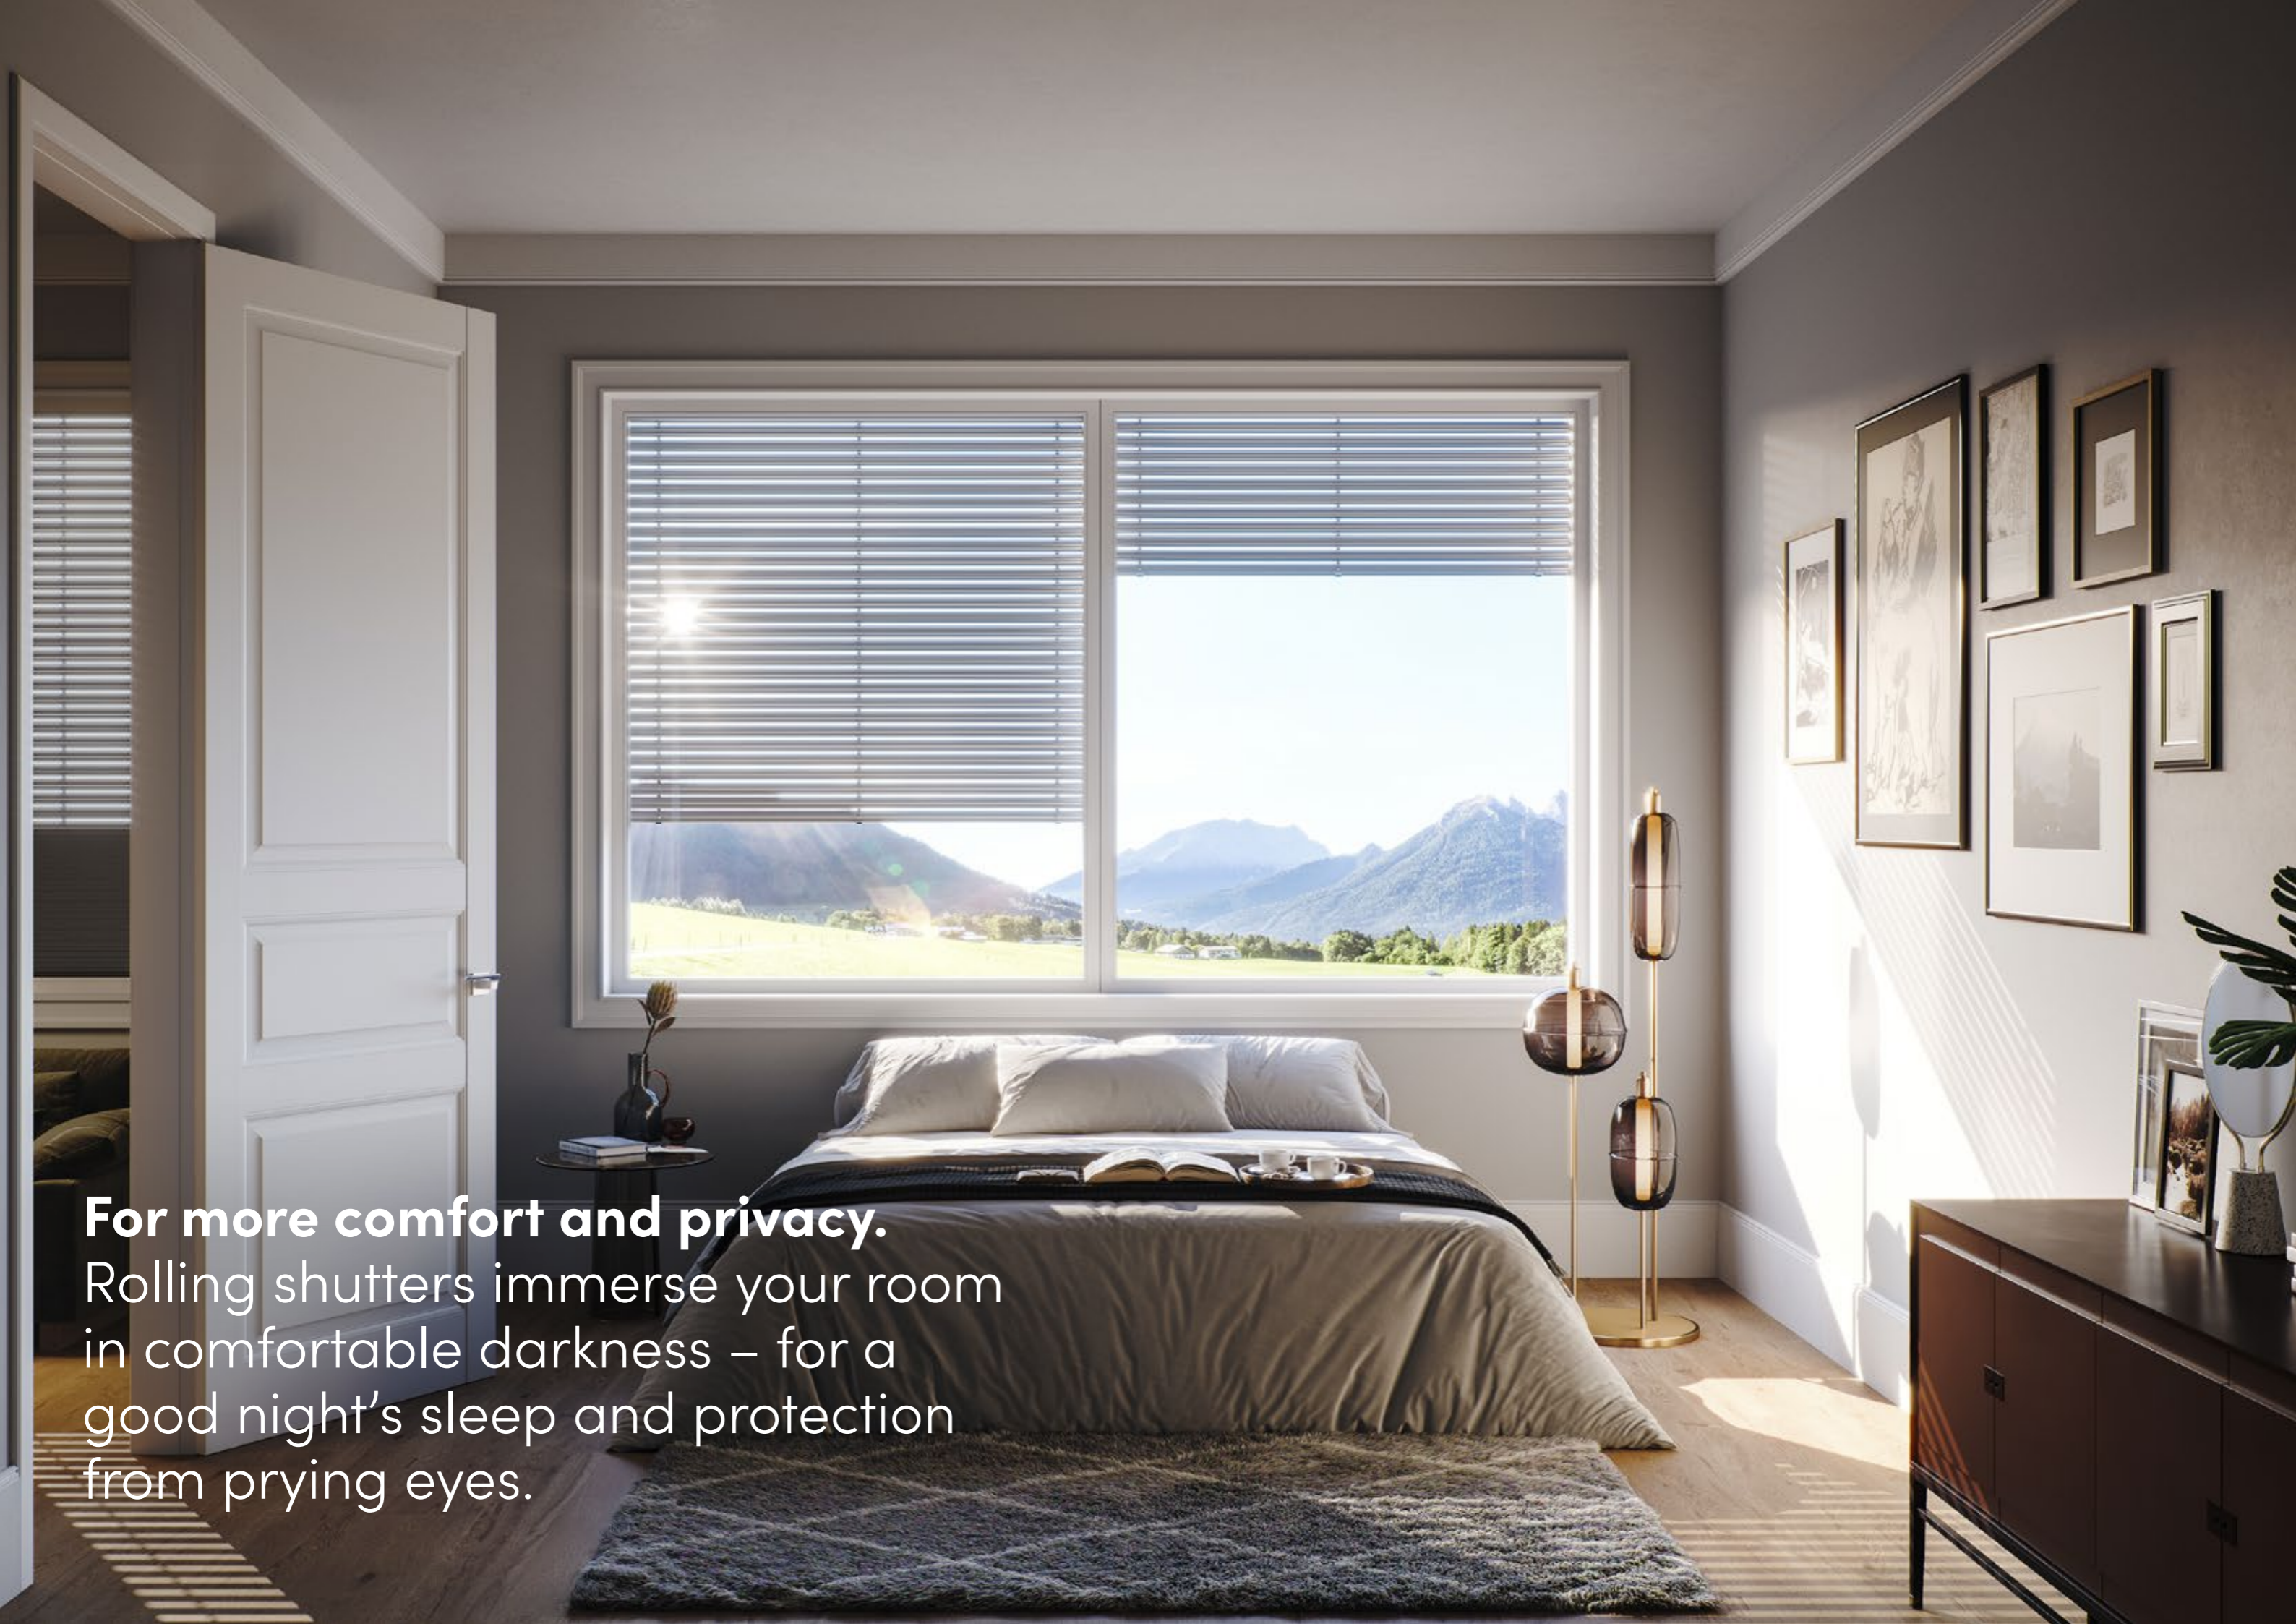

Weather protection.

When a rolling shutter is closed, it's closed. Nothing can come in from outside, unless you want it to. Not even wind or weather. Even under stormy conditions, you can always feel safe and secure within your own four walls.

Modern look.

Whether they are flush-mounted or have a shutter box: our sleek rolling shutters integrate perfectly into the facade and the overall design of your building. Perfect for those who love minimal and stylish design. Its slats provide a continuous opening over the entire length.

For more comfort and privacy.
Rolling shutters immerse your room
in comfortable darkness – for a
good night's sleep and protection
from prying eyes.

Rolpac®

Rolpac® is an innovative, timeless and elegant stackable roller shutter with several advantages. The distance between the slats guarantees better ventilation and more light in the room. The automatic stop prevents the roller shutter from being destroyed in the event of an obstacle.

Rolpac®: As it takes up little space, Rolpac® is the perfect substitute for facade awnings and external venetian blinds. This thanks to the small space requirement of 130 mm lintel niche. With slits that can be adjusted by up to 6 mm, light and air can be perfectly regulated.

Highlights

- Modern design thanks to flat aluminium slats.
- Stackable roller shutter that can be mounted in a very small space.
- Locking system.
- Auto-stop system if an obstacle is present.
- Perfect integration in the façade. Not visible from inside. Self-supporting installation.

Daylight control /
Glare protection

Dimming /
Privacy

Wind resistance /
Stability

Rolpac® options

- Large selection of colours.

Alucolor®

Thanks to its flat slats, Alucolor® is a very popular and versatile product whose unique design will bring a modern touch to your windows.

- ⊕ Alucolor®: Light and airflow can be optimally managed thanks to a 4 mm gap between each slat.

Daylight control /
Glare protection

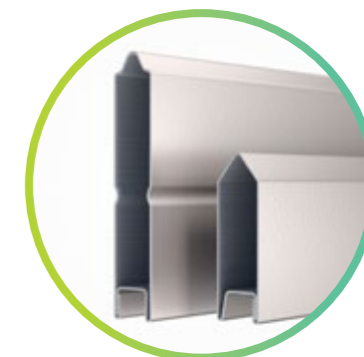

Dimming /
Privacy

Wind resistance /
Stability

Highlights

- Timeless design thanks to flat aluminium slats.
- Perfect integration in the facade. Not visible from inside. Easy to install.
- Can cover windows up to 5 m wide.

Alucolor® options

- Large selection of colours.
- Locking system.
- Auto-stop system if an obstacle is present.
- Sliding arm: Simply push the rolling shutter outwards to let in fresh air.

Minicolor®

Minicolor® is the narrowest of the rolling shutters with foam-filled slats. And highly flexible: the product is perfect for renovations and conversions, but also for new buildings.*

⊕ Minicolor®: the rolling shutter that's always a perfect match. Elegant, timeless, adaptable.

Highlights

- Outstanding noise insulation properties thanks to CFC-free foam-filled slats.
- Fresh air supply thanks to slats with air and light slits.
- Particularly versatile.

Explore the **world of Griesser colours.**

A broad palette of colours.

For Alucor® and Rolpac®, choose from our 150 Griesser colours. For these two products, you can even choose a colour that is not included in the selection but is the perfect match for your facade. Our experts look forward to fulfilling your wishes. New colours are added every year – so we can keep up with trends, and set new ones.

All devices compatible with your **Smart Home.**

Control Solutions from Griesser.

Whilst you are busy completing everyday tasks, or if you are away from home, Griesser control solutions can autonomously manage energy efficiency, indoor comfort and the protection of your blinds.

Adjusting the brightness, managing the interior temperature by regulating the amount of natural light coming in, and providing security in windy conditions ... Making energy savings is effortless and you'll benefit from maximum comfort for many years to come.

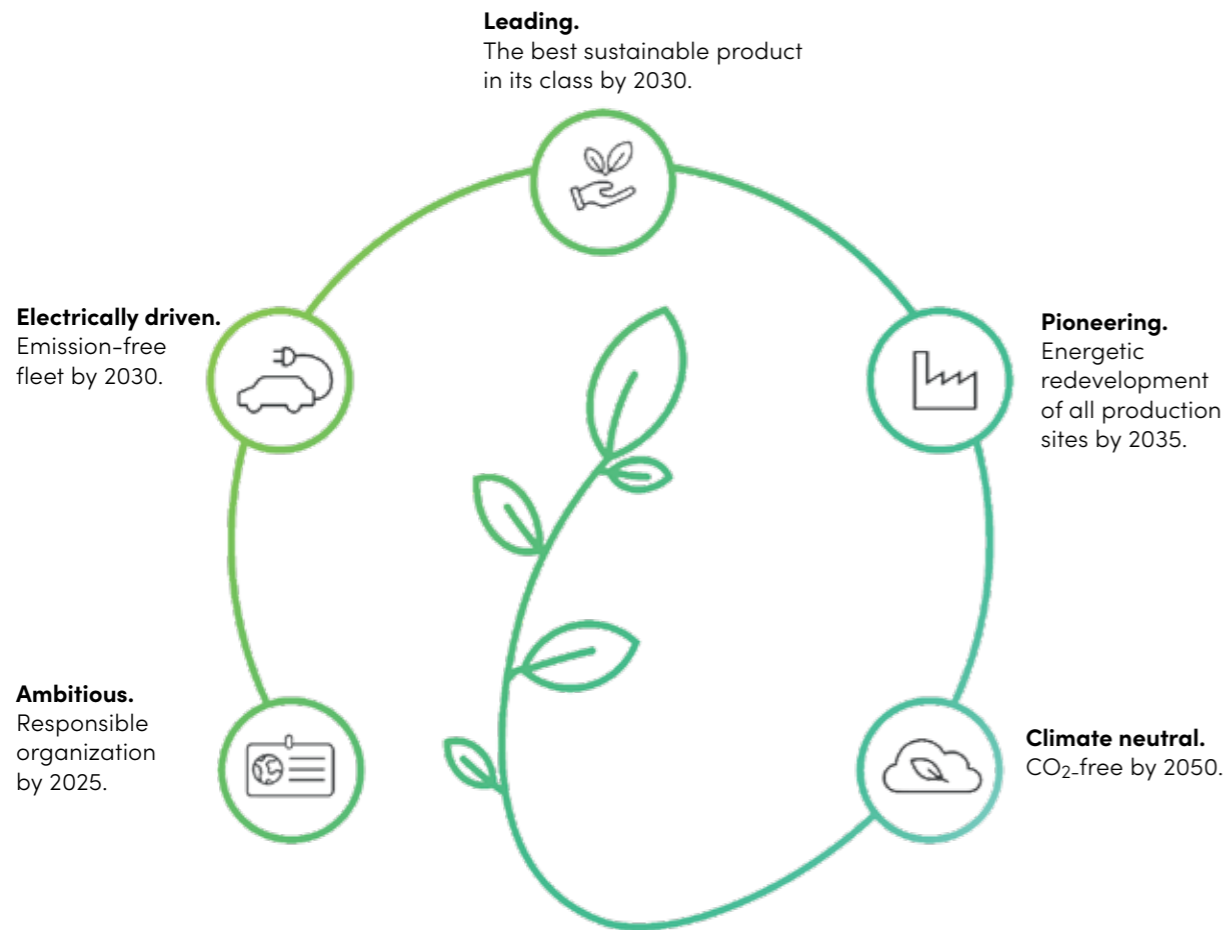

Connectivity.

Griesser has an in-house development team devoted to control systems that is working on new approaches and partnerships which will enable external Venetian blinds to be controlled using the widest possible range of technologies.

Sustainably innovative.

Climate and growth in balance.

As a future-oriented company, we are aware of our responsibility towards nature and the environment. Our actions are geared toward long-term sustainability.

Innovative products from resource-saving production, targeted investments in sustainable building renovations and the conversion of our company fleet to e-mobility are just some of the essential characteristics that distinguish our company, which is oriented toward sustainable business.

We can only achieve the goals of our climate vision together. On the way to a climate-neutral future, we rely on cooperation with committed partners. Since 2008, we have been an active partner of myclimate, one of the leading providers of CO₂ offsetting and climate protection consulting. The renowned business association swisscleantech is also one of our strong partnerships. As an active supporting member, Griesser has signed the charter for a CO₂-neutral Switzerland by 2050. But we are also active on the international scene: Since 2022, we have been a member of the UN Global Compact – the world’s largest association of sustainably operating companies and the United Nations.

Smart strategy: reduction of building energy with automatically controlled Griesser products.

Sustainable construction: largest EPD/FDES-certified product range in the sector.

Proven recycling: climate-neutral disposal of Griesser blinds for 15 years.

For the future of the climate: long-term partnerships, additionally targeted promotion of climate protection projects.

Sustainable family business: honored with the Family Business Award 2022.

We don't just talk: we act.
We show our drive and ambition in our various commitments towards a better future. Find out all about our endeavors to help ensure a sustainable future.
