

Smart Home.

The intelligent key to a healthy and sustainable home.

Energy-saving.
With solar shading automatically controlled.

Cozy comfort.
A perfect indoor climate almost by itself.

Fully connected.
Open interface for third-party products.

 **GRIESSER**

Discover the Griesser Smart Home experience.

Use our gateway to bring your digital home into the networked world. Be it with iOS or Android, you have control, locally or in the cloud. At all times and wherever you may be, your indoor comfort is just a fingertip or a voice command away. And on top of all this, you'll save on energy, too.

Smartly connected.

The living of tomorrow.

If you're seeking a flexible and forward-looking home system, you should really consider an all-in radio-controlled solution. Smart connected home systems don't just offer automated solar shading: they can be extended to your windows, doors, lighting and security sensors and your heating, too.

1 Radio motorisation.

As a first step, upgrade your venetian blinds, awnings, roller shutters, sliding shutters and sliding and folding scissor shutters with special radio motors. You can then raise or lower them using a remote control. That's already comfortable and convenient.

2 Expand.

For even more comfort, add weather sensors to your radio motors. This is especially practical outdoors: in rain, storms or frost, our solar shading products on the building close automatically. This extends product service life and provides greater comfort.

3 Connect.

The final step takes you straight into the world of the connected smart home. Our BiLine Box makes it possible: it links all Griesser smart-home devices, which you can then control centrally – via the Griesser app, voice commands or third-party devices* – wherever you are, anytime.

Your smart home, always within reach.
With the Griesser app, you can control your home exactly the way you want – wherever you are.

Create your own personal smart home and adjust it continually to your preferences and habits.

There's no limit to the ways our home controls can be used. You can profit immediately from the easy and intuitive control of your solar shading, by hand-held or wall-mounted transmitter. You can then decide later how far you wish to go in connecting, convenience and security terms. Individual adjustments – of window, light and heating controls – can be easily made at any time. And the more you connect them all, the more benefits you will feel.

Your benefits from automatic solar shading control:

Energy savings.
Use smart daylight management to cut your summer energy consumption by up to 40% and reduce your winter heating costs.

Comfort and well-being.
Daylight is essential to our health and well-being. Griesser SmartHome provides intelligent protection from overheating while ensuring that your living space receives adequate daylight, too.

Daylight management.
With its smart adjustments to the sun's position and the lighting conditions, Griesser SmartHome ensures optimum room lighting without unwanted reflection or glare.

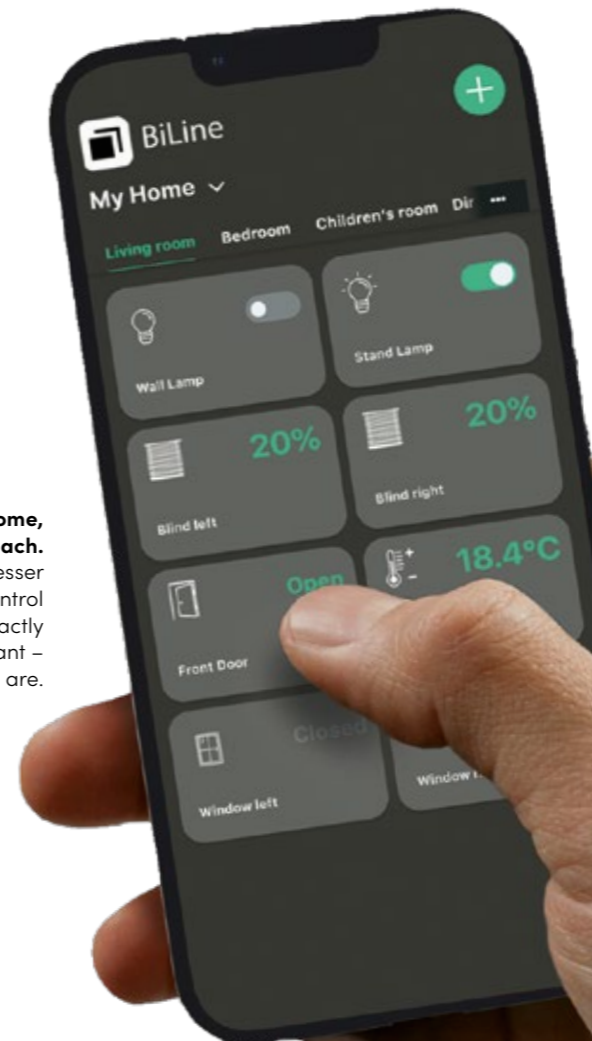

A sense of security.
Even when you are not at home, Griesser Smart Home can make your house look occupied, with solar shading systems that can be time-controlled or vacation-programmed. The system can be extended to motion sensors, too.

Undisturbed privacy.
Griesser SmartHome's automatically controlled solar shading protects you from undesired visual intrusion to make your home a genuine feelgood oasis.

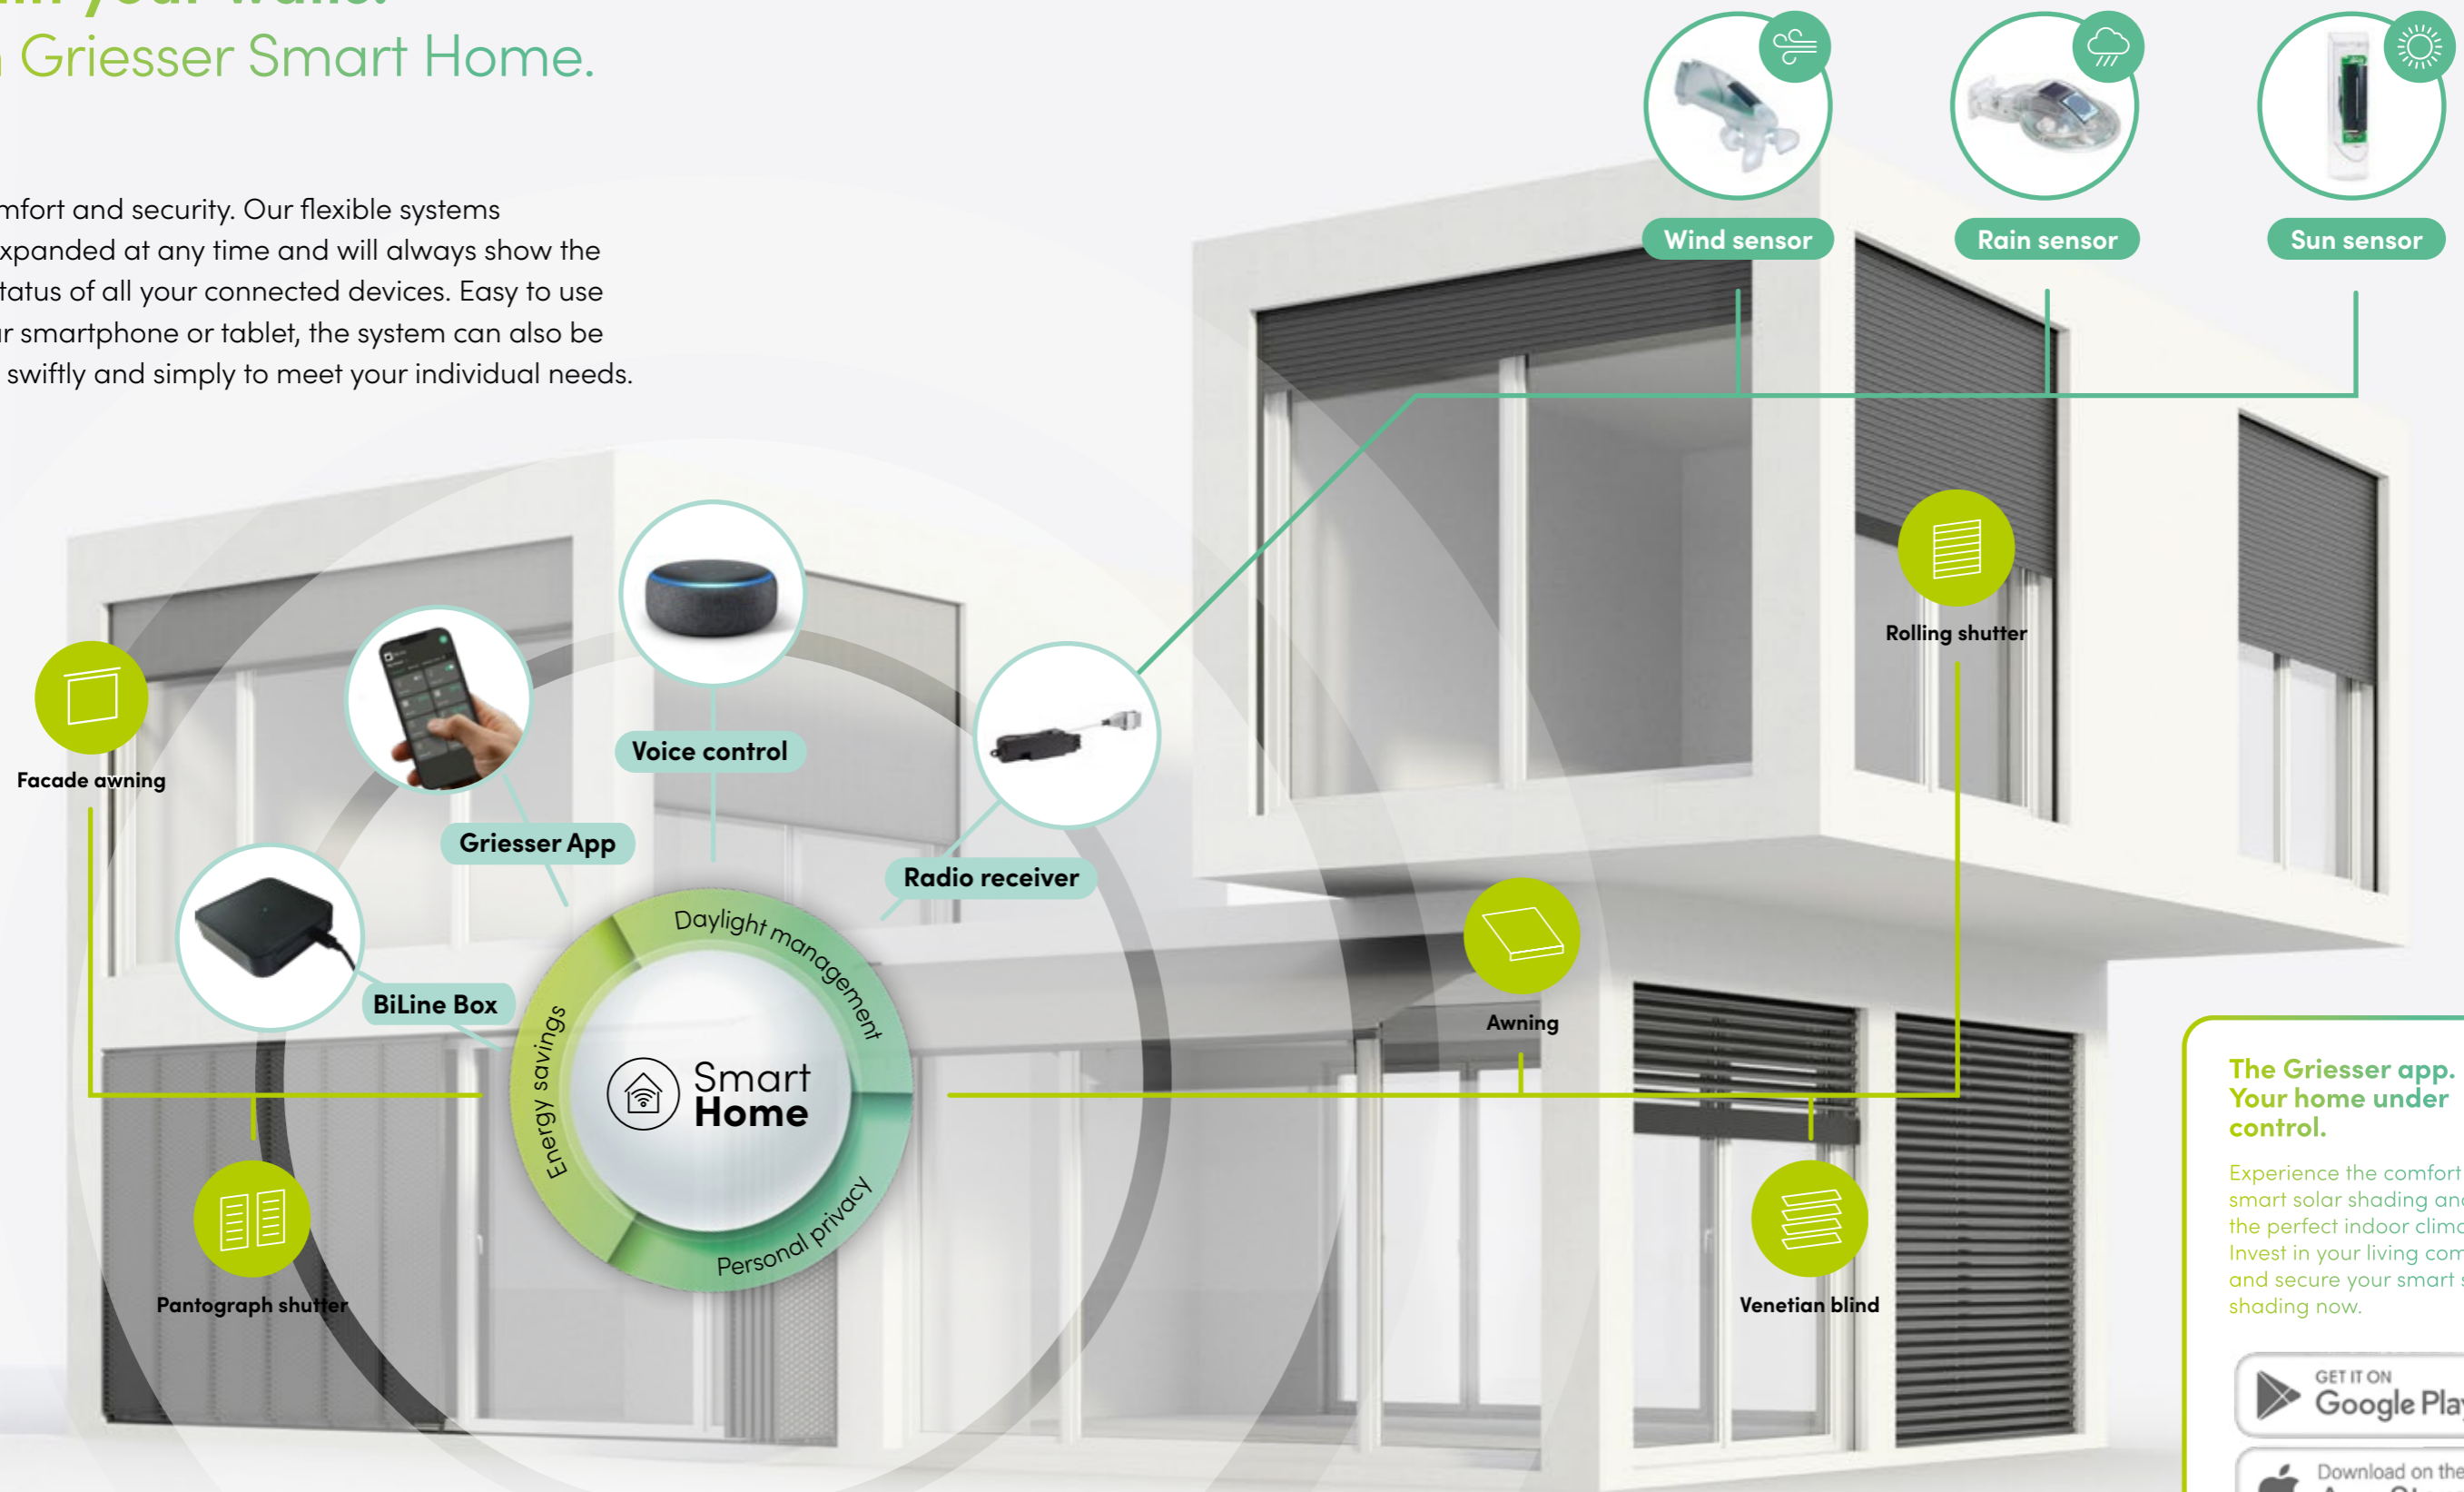

Protecting your investment.
Griesser Smart Home's weather sensors will protect your solar shading products to safeguard this valuable investment.

* Unfortunately, Griesser cannot provide support for Matter-compliant third-party devices..

Feeling good and well within your walls. With Griesser Smart Home.

Enjoy comfort and security. Our flexible systems can be expanded at any time and will always show the current status of all your connected devices. Easy to use from your smartphone or tablet, the system can also be adjusted swiftly and simply to meet your individual needs.

Visual and thermal comfort and a healthy indoor climate. In our times of sustainability, energy saving and energy revolution, these have never been more vital.

Visual comfort.

Visual privacy, glare protection and daylight regulation.

Thermal comfort.

An ideal indoor climate and high energy efficiency.

Protective comfort.

For greater privacy and seclusion.

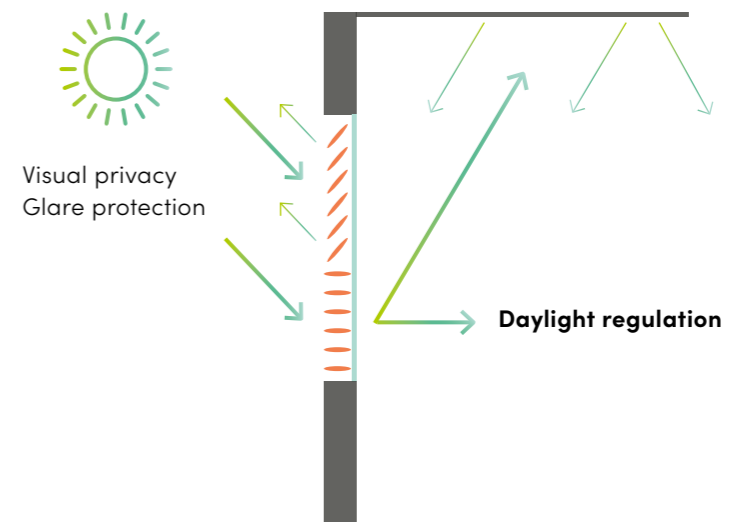

Daylight management.

Visual comfort, refined design and smart light direction.

The Griesser Smart Home system is your key to making optimal use of valuable natural light with all its health benefits.*

With our Smart Home technology, you can set and automatically regulate the natural light that is so essential to our powers of concentration and our general well-being so precisely that you will always maintain a harmonious ambience within your home which is calm and appealing to the eye. Glare effects are substantially reduced, while still making more efficient use of valuable natural daylight.

«Overall, we are very satisfied with the Box. The automation functions, in particular, make our lives much easier.»

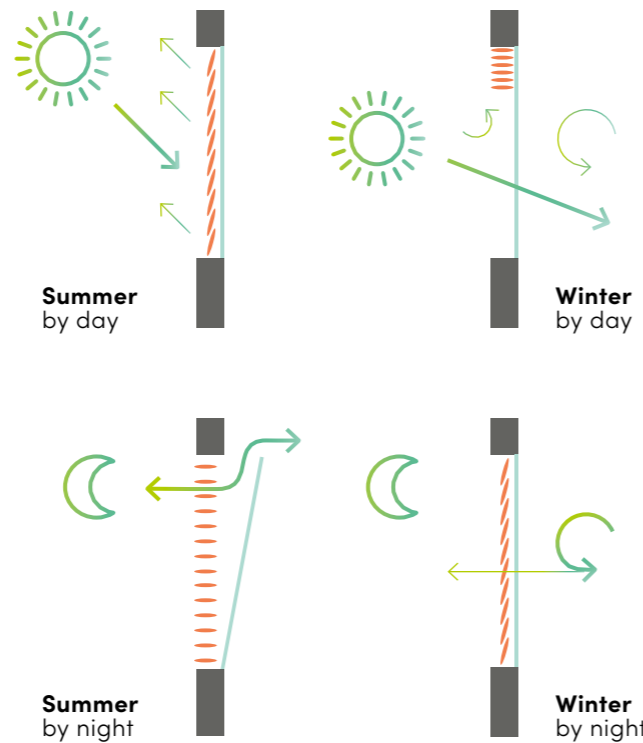

Mauro B., detached house owner, 5034 Suhr, Switzerland

Energy savings.

Thermal comfort through a perfect indoor climate with high energy efficiency.

With Griesser's smart and automatically controlled solar shading systems, you will maintain an optimum indoor ambience at every time of year. Griesser's sensitive systems respond automatically to light and temperature conditions to ensure that your home enjoys comfortable steady temperatures.

Your rooms will be kept ideally warm or cool, while simultaneously reducing your heating and cooling needs. Griesser's smart management will save you valuable energy and can lower your energy consumption by up to 40 % compared to air-conditioned premises* – which is good news for both your budget and the environment. Steady temperatures also help maintain a healthy indoor ambience and can even reduce the risk of colds. All in all, a perfect symbiosis of sustainability, comfort and good health.

The climate in our home is much healthier now – and we're saving on energy, too.

Marie M. – Verona

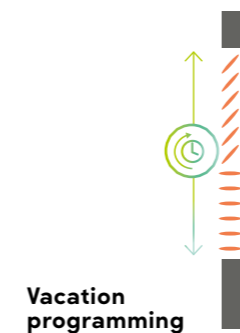

Personal privacy.

Protective comfort through visual privacy for more personal space.

We always feel our home is safe and secure, even when we're away.

Claudia L. – Nice

Immerse yourself in the sense of a safer and securer home through our automatic solar shading systems.

Griesser solar shading solutions go far beyond the usual protection from the sun and the weather to provide genuinely cozy protection. They will enhance your privacy; and they will improve your security, by deterring any would-be intruder. With our automated solar shading systems, you will have full and constant control over your home – even while you are away. Many of our Griesser products are also equipped with security locking features to further strengthen their protective credentials. So why not enjoy all the comfort and the security that our protection can provide in its finest form?

+ Vacation programming.

+ Security locking.

+ Sight protection.

A perfect interaction.

The smart upgrade for your home from Griesser.

Solar shading, weather sensors, receivers and the Griesser app work seamlessly together. With the BiLine Box, you can make your existing rolling shutters and blinds intelligently controllable – easily, conveniently and smartly.

The free Griesser app allows convenient control via smartphone or tablet – without replacing your existing installation. Griesser Smart Home therefore brings added comfort, security and energy efficiency to your home.

+ New free Griesser app.

+ Matter compatible.

+ Integrated astro function.

+ Enhanced security.

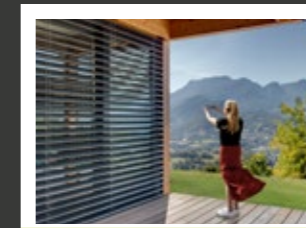

*Studies into smart homes.

The European Solar Shading Organisation (ES-SO) has shown in a series of studies that the use of smart solar shading solutions delivers sizeable energy savings. Avoidable heating costs in the colder months and cooling costs in the warmer months can quickly add up. But an intelligent combination of automated indoor and outdoor shading can substantially reduce both energy costs and carbon dioxide emissions.

These findings underline the vital role that smart solar shading systems can play in our endeavors towards sustainable and energy-efficient buildings.

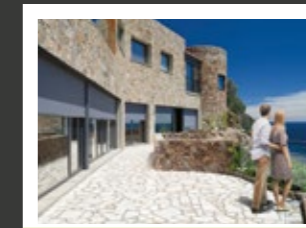

The latest studies and research findings will be found at: es-so.com

Compatible solar shading from Griesser with the BiLine Box, Item no. 185067.

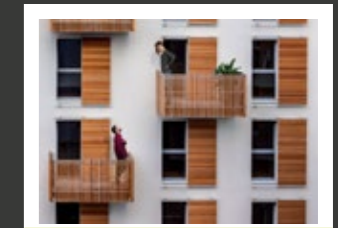

Venetian blinds.

Radio receiver BiLine Combo «JA» and comfort radio motor ECB.

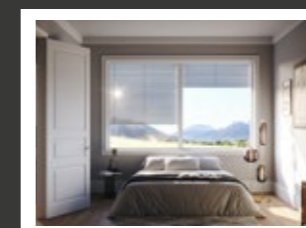

Facade awnings.

Radio receiver BiLine Combo «RM».

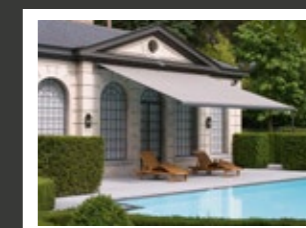

Window shutters.

Radio receiver BiLine Revio «P / UP».

Rolling shutters.

Radio receiver BiLine Combo «RM».

Awnings.

Radio receiver BiLine Combo «MAK / MLED / MVLED».

Patio roofs.

Radio receiver BiLine Combo «MAK / MLED / MVLED».

Sensors.

Sun and wind sensor.

Records wind speeds and transmits these to the control center.

Sun and rain sensor.

Sends a signal at the first sign of rain or excessive sunshine.

Sun sensor.

Automatically deploys your awning in summer if the sun seems too strong.

Radio receiver, control center and app.

Radio receiver.

Griesser solar shading controls use high-quality sensors to monitor weather conditions.

Control center.

Data on light, wind, temperature, precipitation and global radiation are all transmitted to the control center.

App.

Raise your quality of living: begin your journey to a smart and connected home.

Design your home today – for the future of tomorrow. With Griesser Smart Home.

Whether new build or renovation: with Griesser Smart Home, you make decisions that have a long-term impact and flexibly adapt to your living situation. Start with just a few components – expandable at any time – and conveniently control everything via the Griesser app.

Step by step into a smart future:

- **Today:** automatic control via app.
- **Tomorrow:** extension to lighting, heating and additional comfort functions*.
- **Future:** a fully connected home that intelligently combines security, energy efficiency and comfort.

Benefit from over 50 years of experience:
Since 1972, Griesser has stood for solutions that harmoniously combine technology and living comfort.
